

MUSIC AT HOME 3-6

Music at home can take many forms.

I have included a few different ways to work on musical proficiency and enjoyment at home over the next few weeks.

Things to pick up at school: Theory Sheets, Recorder, and Recorder book

Theory Sheets:

Each student can complete all activities they know how to do, and attempt any new information they would like to try.

Recorder Karate:

All students have been sent home with their recorder and a recorder karate booklet or extra belt song sheets. **Grade 3 and 4 students should aim for 1-2 belts and grade 5 and 6 students should aim for 2-3 belts.** They may test for as many belts as they are prepared for when we are back at school.

Compose a song (or more):

Students have all composed their own songs in class. I've included some composition paper for them to write their own melodies.

Other activities:

Students have explored my website during class and know how to access activities and videos that they can use during their time away. I will continue to add additional items over the next few weeks.
